

# Welcome to mallchin.com!

Friday, 24 February 2006

Well, here's a stab at keeping a blog/portal. If you haven't tried Joomla yet, I'd give it a go. It has a nice, polished interface (a lot smoother than Drupal), and a wealth of available templates, albeit non-free.

So, I put this together to store my contributions to the World at large, for better or worse. Here-in lies some bash scripts, some PSP stuff, and my photo gallery. Enjoy.
