

Birthday soon :D

Monday, 28 August 2006

It's my Birthday tomorrow w00t!

I've been busy with work as ever lately so not many updates on the site. When things are a little quieter I'll try and get some more stuff up here, it's a little sparse for now.

In other news, my keyboard stopped working the other day :-/ On the bright side, I'm using an old biege AT one, its Dell not IBM, but what the hey. It has nice tactile clicky clicky keys and after my rant about non-generic keyboards I'm feeling right at home.
