

Joomla! - Gallery2 Searchbot mambot

Wednesday, 10 January 2007

There's a small bug in the gallery2 bridge searchbot for Joomla. Notably, the function `utility::g2DateToMambo()` has changed to `utility::formatdate()` as noted in this diff.

To fix we simple need to update the function being called. At the time of writing this is line 63 in `mambots/search/gallery2.searchbot.php`.

Edit like so:

Old:

```
$info->created = utility::g2DateToMambo($time);
```

New:

```
$info->created = utility::formatdate($time);
```

Note: This has been fixed in the latest version available [here](#).
